DETAILED ACTION

Response to Amendment

The amendment filed 7/25/05 is objected to under 35 U.S.C. 132(a) because it introduces new matter into the disclosure. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: "a dosage of the substance for achieving a systemic distribution of the substance is reduced by at least 10%" and also 20% or 30%.

Applicant is required to cancel the new matter in the reply to this Office Action.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 69-75, 77-95, 97-104 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Specifically relating to claims 69, 77, 78, 85, 97 and 98, the specification does not establish that a dosage for achieving systemic distribution is reduced by 10, 20 or 30 percent. The specification does state "The inventors have found that substances can be rapidly absorbed and systemically distributed via controlled ID administration that selectively accesses the dermal vascular and lymphatic microcapillaries, thus the substances may exert their beneficial effects

Art Unit: 3763

more rapidly than SC administration.” and “Another benefit of the invention is to achieve more rapid systemic distribution and offset of drugs or diagnostic agents.” (see summary). The specification only sets forth that intradermal administration provides a more rapid systemic distribution. No link in the specification is made between systemic distribution and the reduction of the dosage or more specifically the percent of the reduction.

Conversely, the specification does set forth reducing the dosage by 10, 20 or 30 percent. However, this reduction is in connection with achieving a biological effect, treating a symptom or bioavailability. A biological effect, treating a symptom or bioavailability is not presented as the same as systemic distribution in the specification.

Response to Arguments

Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period

Art Unit: 3763

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
